---

## CAREER OBJECTIVE

---

As a Full Stack Developer and Designer, I will use my excellent software development knowledge, agile developer experience, and excellent communication abilities to design and develop new awesome new applications. In addition, I will participate in design decisions, collaborate closely with other engineers, architects, cloud engineers, support teams, and other stakeholders. Also, I would be willing to learn any tech stack. In addition, I will keep innovating new ideas to evolve the company's applications and processes.

## HIGHLIGHTS OF QUALIFICATIONS

---

- Diploma of Software Engineering Technician (Fast-Track) at Centennial College
- Bachelor's Degree in Computer Science from the University of Manitoba
- Extensive experience with design, development, and implementation of dynamic web applications
- With collaboratively with others in an agile team environment on software development projects
- Extensive experience with testing web applications
- Ability to work independently with minimal supervision
- Passion in delivering value to users
- Soft skills: Excellent communication skills, Creativity, adaptability, team player, and work ethic

## TECHNICAL SKILLS AND KNOWLEDGE

---

<b>Networking</b>	Install and configure PCs to participate in a network environment Configure network operation system for small groups
<b>Programming</b>	MongoDB, Mongoose, Passport mongoose, Express framework, NodeJS & Typescript, JavaScript, Object Oriented Programming, AWS, REST API standard and design, Postman, Redis caching and locking, Redis Sockets, Socket.io, AngularJS, React, HTML5, CSS3, PLSQL, MYSQL, C#, Java, Jest, Mocha, and Chai
<b>Operating Systems</b>	Windows, Apple Macintosh
<b>Applications</b>	Microsoft Office, Visual Studio, Visual Studio Code, Eclipse, GitHub, Mongo Atlas, AWS, Docker, Kafka, Heroku, Postman, JIRA, Bitbucket
<b>Other</b>	Extensive knowledge of designing and analyzing algorithms, extensive knowledge of design patterns, extensive knowledge of Sequence Diagrams, ERDs, Conceptual/Logical/Physical architectures, extensive knowledge of installing and configuring

back-end servers and services, extensive knowledge of configuring front-end applications to communicate with back-end applications, and extensive knowledge of testing software applications

## EDUCATION

---

<b>Software Engineering Technician (Fast-Track)</b>	<b>Centennial College</b> 4.147/4.5 Degree GPA Toronto, Ontario, Canada <b>Relevant Courses Include:</b> Advanced Database Concepts; Java Programming; Web Application Development; Object-Oriented Software Engineering; Programming 3; Software Development Project 1; Software Testing & Quality; IT Project Management <b>Relevant Projects Include:</b> Software design for Agile teams, agile web development using Mongo, Passport mongoose, Express, AngularJS, and NodeJS, Database configuration, Application development using Java, Application testing
<b>Bachelor of Science Degree (Computer Science)</b>	<b>University of Manitoba</b> Winnipeg, Manitoba, Canada <b>Relevant Courses Include:</b> Introduction Computer Science; Object Orientation; Human-Computer Interaction; Software Engineering; Computer and Network Security; Design & Analysis-Algorithms; DB tuning & Distributed DBS <b>Relevant Projects Include:</b> Website design, Software design, Application development using, Database configuration, Application development using Java, Application testing

## RELATED WORK EXPERIENCE

---

<b>Fullstack Software Developer (Contract)</b>	<b>Rappid Software Design Inc. (<a href="#">Rappid Project - Kameo</a>)</b> (August 2, 2022 - December 29, 2022) Via our client, Kameo, I am part of an agile team developing their covid testing and vaccine tracking service for Movie and TV productions. This system is currently being used by companies such as Disney and Netflix. <b>Skills:</b> Information Security · Front-End Development · Responsive Web Design · SASS · Jira · Test Driven Development · Google Cloud Platform (GCP) · Angular · NestJS · Node.js · TypeORM · Back-End Web Development · MySQL · Git · Bitbucket · Slack · Angular · NgRx · Figma · Typescript · Redux
<b>Software Developer</b>	<b>HKM Corporation</b> (January 2018- August 2022) <ul style="list-style-type: none"> <li>Designed a user interface for the company's android mobile game with XML, Android surface view, and raster images.</li> </ul>

- Developed a game engine for the company's android mobile game with Java.
